

What is claimed is:

1. A hydrant nozzle for connecting a fire hose to a fire hydrant, said hydrant nozzle comprising:

5 a tubular body portion extending longitudinally between a first end and a second end, said body portion having a generally cylindrical outer surface and a generally cylindrical inner surface defining a fluid passageway between said first and second ends;

DUB 132 > a cylindrical neck portion extending from said second end of the body portion to a front face and having an outer peripheral rim and an inner rim defining a center opening in fluid communication with said fluid passageway of said body portion;

10 a pair of spaced apart locking lugs projecting outwardly from said outer surface and positioned between said first and second ends of said body portion for removably securing said hydrant nozzle to the fire hydrant; and

a pair of spaced apart arcuate shaped locking grooves recessed in said front face of said neck portion for removably securing said hydrant nozzle to the fire hose.
